

## Fall DOT Cycle

August 1<sup>st</sup> kicked off the Fall DOT cycle. If you have been pushing yourself and your equipment all summer, now is a great time to take a break and make sure everything is DOT legal. Keeping yourself and your equipment compliant is the best way to avoid delays from equipment failures, tickets, and DOT shut downs.

- Contact **Driver Road Services** today to set up an inspection at a SIRVA approved DOT shop.
- Call **DRS** to get those worn brakes or tires replaced.
- Don't be caught sitting along the road wishing you had taken the time.

In the event you are ticketed for an equipment violation, contact **DRS** to get the issue repaired promptly. We electronically store your invoice for you on our website. You have 24/7 access to view or print it.

The fall DOT cycle ends October 31<sup>st</sup>. Don't wait till the last minute.

Call **Driver Road Services** now at your convenience, so you don't need to call us later when it's not as convenient. Either way, we are here for you 24/7/365.
